

LINDEMANN TRUST

LINDEMANN TRUST FELLOWSHIPS

Notes for Referees

Thank you for agreeing to be a referee for a Lindemann Trust applicant. We appreciate the time and effort this takes, and are grateful for the support you are giving to further the candidate's application.

We should be grateful for a careful analysis or opinion of the applicant's capacity for continued and independent research, their seriousness of purpose, and any other information likely to be helpful to the selection committee.

The aim of the Fellowships is to further scientific research and only really outstanding candidates can be considered.

Your comments can be entirely confidential. Please note that applications are reviewed by the Lindemann Committee, which comprises scientists from a variety of different specialisms. This means that not all members are specialists in the area of work that the candidate's proposal is in. Please consider this when writing your reference.

The reference must be uploaded by Wednesday 8th February 2023. Once the candidate has started their application through the online portal, you will receive an email informing you of where and how the reference can be uploaded. Please send any queries to director.lindemann@gmail.com

Many thanks.
